What's New in AutoTURN Version 8.0

- » **Place Adaptive Simulation:** Ability to link simulations with lines, arcs, or polyline.
 - Simulations updated automatically when the user performs grip points dragging on linked objects.
 - Ability to create simulation on alignment objects for vertical CAD programs.
- » Ability to perform conflict analysis with objects placed within a user specified obstacle layer/level.
- » **Regenerate Simulation:** Ability to recreate a simulation taking into account any changes to the obstacles that interact with the simulation envelopes.
- » **Manage InVision:** Ability to add and remove InVision data within AutoTURN.
- » Enhanced animation slider within the **Run Animation** tool.
- » Override Angle for Special Transport is now independent of directional change in the articulating point for the trailer.
- » New ribbon bar for Autodesk® AutoCAD® users.
- » Full compatibility with Autodesk® AutoCAD® 2012 and Bentley® MicroStation® V8i.
